# The future of Remote Service – NOW!

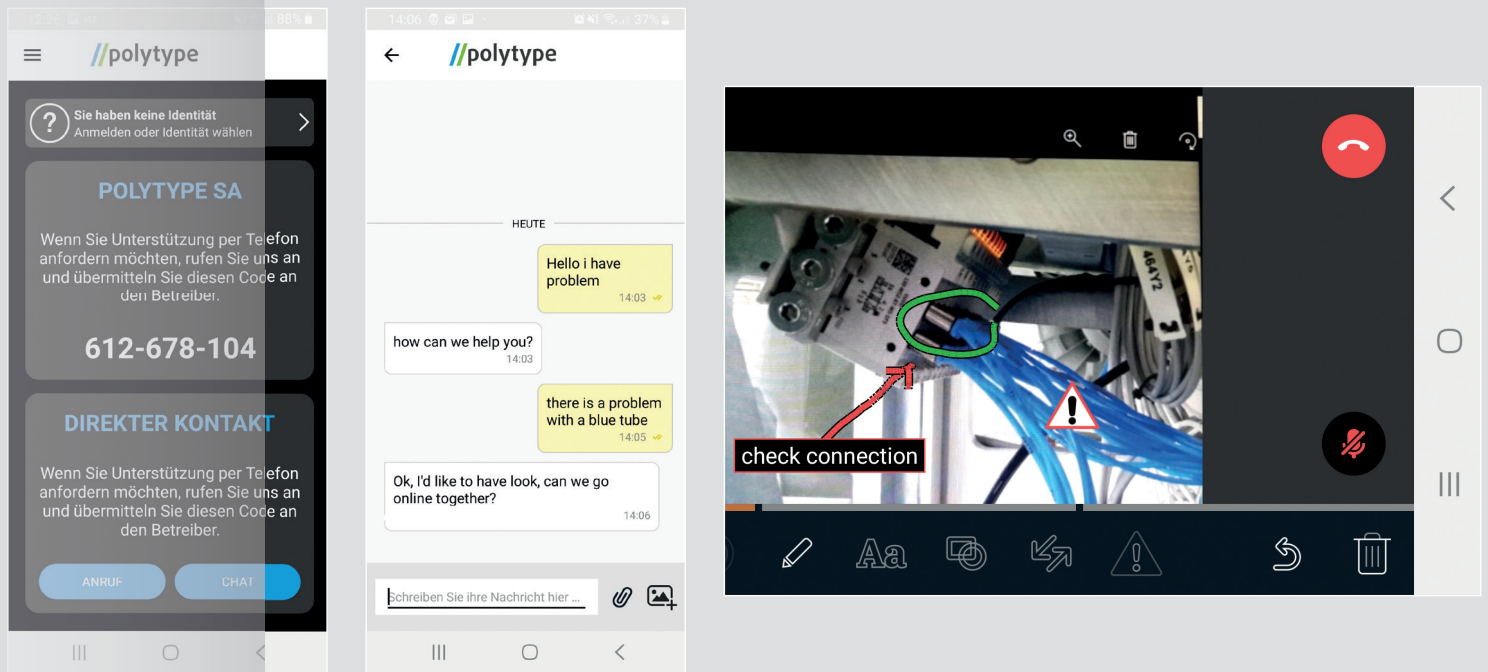

Augmented reality remote support  
with Polytype Digital Services

 polytype

# Maximize machine uptime with Polytype AR Support

- // Modern, interactive video conference
- // Fix problems faster
- // Higher machine uptime
- // Reduce travel cost

Problems or failures on high-end production machines normally require visual inspection in order to intervene effectively and fix the issue efficiently. Field technicians or customers equipped with Polytype's augmented reality support technology can communicate in real time with their expert colleagues. Distance and in many case additional travel cost is reduced or possibly eliminated thanks to the ability to collaborate through an interactive video conference. Thanks to this expert knowledge is available everywhere and highly increases the chance of first time fixes and reduces machine downtime.

Our portfolio of innovative digital products and services can help protecting your investment and improving your bottom line. A team of qualified specialists provides dedicated support and reliable service using the latest communication technology.
