

The art of top  
class decorating!

Machine range for  
plastic tube manufacturing

 polytype

# Competence and experience combined with Swiss quality

- // Decorating and capping of plastic tubes with a speed up to 300/min
- // High reliability and optimum productivity
- // Innovative solutions
- // Outstanding service and short response times
- // Large number of tube machines installed

There are many different ways that a plastic tube can be produced. //polytype has the ideal solution for all processes, ensuring that high-quality tubes can be manufactured efficiently. Whether inline or offline configurations, standard processes with direct tube printing or the variant whereby sleeves are decorated before their shoulders are added – //polytype has applied all these approaches several times over.

The range of machines from //polytype ensures that any tube can be printed – there is a solution for every specification and need. In addition to a broad portfolio of machinery, //polytype also offers a wide range of decoration processes that meet all requirements:

- // Dry Offset
- // Waterless (Toray)
- // Process Offset
- // Flexo print
- // Screen print
- // Cold and hot stamping
- // Digital printing
- // Lacquering and spot lacquering

A wide range of plastic tube production equipment offers an optimum solution for every need, from the RDA-T and CM 120 entry-level machines to the high-speed RDA 24-300 and highly flexible multi-decoration //polytype Linearis model. The various machine types are combined largely on the basis of production speed and line configuration.
